To install the studs, always use the installation tools, procedures and torque specified in the instructions. Proper installation provides maximum product longevity and helps prevent track damage. BRP recommends that studs be installed by authorized BRP dealers, and on approved pre-patterned tracks only. These tracks come standard on most 2019 Ski-Doo snowmobiles. Look for this symbol on your track. Woody's products are designed to fit and interact with each other. The stud nut and support plate form a complete unit. The use of aggressive skis, ski carbide runners or studs will alter the handling of your snowmobile, particularly in terms of manoeuvrability, acceleration and braking. Please refer to your Operators Guide for more details.

WHEELS & SLIDER SHOES

Sliders with Vespel† Inserts

- Uses DuPont Vespel inserts for less friction.
- Can be cut to desired lenght.
- Better fuel efficiency, more power and increased vehicle speed, due to reduced friction between the track clips and slides.
- Reduced need for maintenance and associated costs.
- Extended life due to enhanced wear characteristics of Vespel polyamide over incumbent UHMW PE.
- Allows riders to operate sleds in less than acceptable snow and trail conditions since water from snow is not needed for lubricity as with incumbent UHMW PE slide rails.
